

# Audio transcript preview tool

---

## How to start

Run `start.bat` in this directory to start a web server

Open Chrome and navigate to:

<http://localhost:8082/>

You should now see the preview tool.

## Adding audio files

Add MP3 and matching VTT files to the `AUDIO_AND_VIDEO_FILES` directory.

Each file and its matching mp3 should have exactly the same filename (only the ".mp3" or ".vtt" file extension should distinguish the files.)

## Running a preview

In Chrome click "Choose Files" then navigate to the `AUDIO_AND_VIDEO_FILES` folder and open all the files. The preview should begin.
